## Free Health Camp

On 8th Nov. 09, a health camp was organized at Samalkha Group of Institutions for the nearby villagers. They were educated regarding the need of good health and cleanliness, in this camp. Medicines related to all common ailments were provided free of cost as per the prescriptions of the team of doctors after check ups.

Launching health camp, Mr. Ajay Goyal (Chairman, Samalkha Group of Institutions) garlanded the chief guest Dr. Sanjeev Goyal (General Surgeon) and took this camp as an opportunity to work for the society. All the Sarpanches of nearby villages were also invited and honoured by the chairman. They also motivated the villagers to utilize this opportunity made available by SGI.

Champions are not supernatural, They just fight one more second when everyone else quits.

Eldest person and highest educated girl from each village was presented a memento and a cash prize by the Chairman.

Various tests including those for diabetes, tuberculosis, malaria, blood group and blood pressure etc were also conducted at the camp. Around 650 patients were screened at this camp.

On this occasion, SGI students acted as volunteers to keep everything in check and ensure that the Health Camp runs smoothly..

Specialists team comprising of Dr. Sanjeev Goyal (General Surgeon), Dr. R. K. Singla (Heart Specialist), Dr. B. K. Gupta (Eye Specialist), Dr. Parveen Gupta (Child Specialist), Dr. Punita Goyal (Gynaecologist), Dr. Vikas Garg (Dentist), Dr. Sakshi Garg (Dentist), and Miss. Monika (Physiotherapist) conducted the check-ups. The doctors advised the chronic smokers and alcohol users to quit the habits to avoid further complications like cancer etc.

# Training on **IBM** technology in **SGI** campus

SGI and IBM has joined hands to impart IBM courses in SGI campus through IBM CEIS programme. Speaking on the occasion chairman SGI, Mr. Ajay Goyal stressed on the need of having updated technical knowledge in the field of Information Technology. This facility is provided to our students on the basis of the performance in the written test held at campus on 12<sup>th</sup> Nov. 09. Students from other institutes are also welcome to study these courses at our campus. Initially DB2 is being taught as per the curriculum. Further advanced IBM courses would be taken up for students. DB2 is a Relational Database Management system which is widely used across the globe in the organizations which are using mainframe technology.

The best part of this tie up is that IBM professionally qualified faculty is training students in the campus itself. These courses will not only increase student's knowledge in the field of software but also make them ahead of their peers in the time to come . Students would be having an upper edge as they will be more placeable when they face the competitive job environment. These courses will boost their chances of getting placed in many companies. Students felt really enlightened after attending few initial classes of these courses.
