

# Software Engineer - Java

**Organization:** Advanta

**Company:** Siemens Technology and Services Private Limited

**Experience Level:** Early Professional

**Job Type:** Full-time

Job Location: PUNE , INDIA

## Job Description

The world is constantly changing and we're always thinking about what's next. Can you help us build the technologies and innovations of tomorrow?

Concepts that make transport more efficient are in demand with the ever-increasing need for mobility. With our long-standing transport expertise and our IT know-how, we are constantly developing new, intelligent mobility solutions that increase availability of infrastructure, optimize throughput and improve passenger experience. It's in how we electrify, automate and digitalize infrastructure that we're setting the benchmark for tomorrow's mobility – today.

Our team of over 3,000 professionals forms a meaningful part of the global network of about 17,500 software guides within Siemens. In India, we have offices in Bengaluru, Chennai, Gurgaon, Noida, and Pune.

## What part will you play?

- Design, build, and maintain efficient, reusable, and reliable code
- Ensure the best possible performance, quality, and responsiveness of applications
- Work towards defect prevention and provide proposals to team and leads for the same

## Use your skills to move the world forward

- 2 – 5 years of experience in Java 8 or Java 11
- Must have good experience in Spring
- Must have experience in Rest web services
- Should have good experience in database
- Excellent communication skills to work in a collaborative manner with colleagues from different nationalities
